PERSONAL PROJECTS

SAFETY MANAGEMENT IN CONSTRUCTION INDUSTRY
- The Main Objective of this project is to investigate the main reasons for construction accidents and suggesting relative preventive measures of accidents
- In the construction industry many accidents take place which causes human tragedies, and disorganization of the construction process.
- Construction injuries have many adverse impacts, including the personal suffering of the injured person. Construction delays, productivity losses ,insurance premiums that result from injuries and poosible liability suits for all parties involved.
- The number of injuries and facilities can be reduced by encouraging and reinforcing behavioral changes and safety precautions.

ACHIEVEMENTS

1. **Secured First rank in Matriculation**, Z.P.H School, Chinapandraka.
2. Participated in **Python workshop** held by Andhra Pradesh State Skill Development Corporation.
